

Micro Focus Fortify Software v20.1.1

Patch Release Notes

Document Release Date: July 16, 2020

Software Release Date: July 16, 2020

Products and/or Components Updated with this Patch

Fortify Software Security Center

Fixes

The following defects are fixed with this patch:

- Custom descriptions that included links provided via customer-defined Fortify SCA custom rules did not respond to clicks when viewing the results on the Software Security Center AUDIT page. The issue has been resolved and links now work as expected.
- Users who had permission to upload analysis results, but not permission to suppress issues, were able to upload FPR files that contained suppressed issues. This has been fixed. Users without permission to suppress issues can no longer upload FPR file that contain suppressed issues.
- Previously, the Fortify Software Security Center user interface did not display more than ten alerts. The alerts functioned properly but were not displayed correctly. This has been fixed.
- Pagination issues:
 - Unable to view more than 10 data items in **Administration > Templates > Issues**
 - Pagination did not work on Scans Request page
 - Pagination problem with sensor in Sensor Pool
 - Pagination issues on the ScanCentral Scan Request page, Sensors in the Sensor Pool view, and the Scan Request page in Fortify Software Security Center have been resolved.
- Previously, if you added more than ten sensors to a pool and then saved the pool, the user interface showed that the pool contained just ten of the added sensors. This has been fixed.
- Sensors now display the correct assignment status.

Installation

To install this patch:

1. Unzip the **SSC_00013.zip** file to get to the **ssc.war** WAR file.
2. Stop Tomcat Server.
3. Navigate to the /webapps directory.
4. Remove the **20.1 WAR** file and replace it with the **20.1.1 WAR** file.
5. Start Tomcat Server.

Post-Installation

Installing this patch places Fortify Software Security Center into maintenance mode. This means that, after you log in, you will need to review and confirm your configuration settings and then restart Tomcat Server. For information about maintenance mode, see the Fortify Software Security Center User Guide.

New Features

There are no new features in this patch.

Documentation

Please use the documentation for the 20.1.0 release of this product.
