

Micro Focus Fortify ScanCentral v20.1.1

Patch Release Notes

Document Release Date: July 28, 2020

Software Release Date: July 28, 2020

Products and/or Components Updated with this Patch

Fortify ScanCentral

Fixes

This patch fixes the following defects:

- A Windows-specific issue with the ScanCentral worker service caused the underlying Java process to continue running, even after the Windows service was stopped. This issue was resolved. The underlying Java process will now stop when the Windows service is stopped.
- A library upgrade caused email notifications in ScanCentral to not function as designed. Now, all email notifications work correctly as configured.
- An msbuild-specific translation error caused by very long command-line invocations was resolved.

Installation

To install this patch, unzip the patch software ZIP file (FORTIFY_00007.zip) to get ScanCentral client and controller distribution files. For detailed installation and upgrade information, see the *Micro Focus Fortify ScanCentral Installation, Configuration, and Usage Guide*. You can access this document from the Micro Focus Documentation website (<https://www.microfocus.com/support-and-services/documentation>).

New Features

There are no new features in this patch.

Documentation

Please use the documentation for the 20.1.0 release of this product.
